Summary

Software developer with expertise in Dart/Flutter for cross-platform mobile development, web development, and Android app development. Successfully designed, built, deployed, and maintained applications using PHP, SQL databases, Oracle, and JD Edwards. Skilled in integrating third-party APIs and payment gateways for secure transactions and improved app functionality. Played a key role in developing modern integration platforms and providing support for legacy apps. Thrives in Agile environments by collaborating with diverse teams and effectively communicating complex technical information. Proficient in project management tools like JIRA and Confluence. Well-equipped to contribute to the success of any software development team.

Experience

Mobile Developer

PT. Berca Hardayaperkasa • Jakarta, DKI Jakarta
02/2021 - Present

- Designed, built, deployed, debugged, and maintained mobile applications using Flutter.
- Integrated third-party APIs to enhance application functionality and create seamless user experiences.
- Implemented payment gateway API to facilitate secure online payments, streamline transaction processes, and provide multiple payment options for users, enhancing the overall functionality and usability of the application.
- Developed next generation integration platform for internal applications.
- Supported legacy apps through maintenance activities such as bug fixes, feature enhancements, and performance improvements.
- Enhanced user experience by designing and implementing intuitive mobile applications for Android platforms.
- Collaborated across multi-disciplinary teams using Agile development frameworks.
- Translated technical concepts and information into terms parties could easily comprehend.

Mobile Developer

Telkomsel Distribution Center (PT. Sarana Media Selular) • Purwokerto, Central Java
07/2020 - 01/2021

- Designed, built, implemented, debugged, and maintained Android applications for sales teams using Java programming language
- Consumed REST API services, managed responses in JSON format, and parsed data to present accurate and real-time information to the sales team
- Contributed to optimizing user input and touchscreen functionality to improve user experience
- Integrated QR scans into the application to support the SIM starter pack and credit voucher scanning process, accelerating sales workflows and minimizing manual input errors
- Collaborated with the development team to ensure that every new feature and system update was well integrated and ran according to user needs
- Implemented features to accelerate data entry and customer interaction
- Improved operational efficiency and sales performance through application development

Intern Web Developer

Dinas Koperasi Usaha Kecil dan Menengah Kabupaten Purbalingga
01/2018 - 07/2018

- Developed a web-based system for turnover recording on Small and Medium Enterprises (SME), Micro Businesses, and resellers
- Utilized CodeIgniter PHP Framework and MySQL database for system development
- Implemented features for tracking product turnover from SME Center
- Collaborated with team members to ensure system functionality and user experience

- Conducted testing and debugging to ensure system performance
- Provided technical support and maintenance for the system

Skills

Dart / Flutter Development, Cross-platform Development, Android, Web Development, PHP, SQL Database, Oracle Database, JD Edwards, Payment Gateway Integration, API Design and Development, Software Development Tools: JIRA, Confluence

Education

Informatics

Universitas Jenderal Soedirman • Purwokerto, Central Java
03/2020
- Completed courses in software engineering
- Graduated with 3.50 GPA

Certification

- Junior Mobile Programmer, BNSP, Taken on 2020
- Learn Fundamental of Web Programming, Dicoding, taken on 2021
- Learn Fundamental of Flutter, Dicoding, taken on 2025
- TOEFL, 570, Taken on 2025
